SUMMARY

Product designer with 3+ years of end-to-end ownership across B2B SaaS platforms and consumer products - from discovery and problem framing through shipped, QA-tested interfaces. Fluent in production TypeScript/React and Swift/SwiftUI; designs with the same constraints engineers work inside. Strong track record translating user research and data into prioritized product decisions, building and contributing to design systems, and partnering cross-functionally with engineering and stakeholders to ship work that moves metrics.

EXPERIENCE

Stellar

Apr 2025 - Present

Product Designer

San Francisco

- Led end-to-end product design for a custom B2B CRM platform - owning discovery, problem framing, information architecture, and delivery through QA-tested, production-shipped interfaces. Reduced handoff rework by prototyping interaction-heavy flows directly in React, eliminating a design-to-dev translation round.
- Defined and shipped multi-step form flows and responsive landing pages - speccing all states (empty, loading, error, success, edge cases) and validating with interactive prototypes before engineering picked up the work. Booking and submission rates increased by ~25% across 10+ client campaigns.
- Owned and extended a Figma component library serving both web and mobile surfaces - introduced token-driven decisions and documented component variants, cutting design-to-dev handoff time by ~30% and enabling engineers to ship on-spec without design review on every iteration.

NRG

Feb 2024 - Apr 2025

Product Designer

San Francisco | Embedded on internal product team, cross-functional with engineering and data

- Identified and eliminated a critical data-corruption error class in internal SEO tools through heuristic evaluation and usability testing - redesigned input validation flows, field-level error states, and inline microcopy; shipped annotated specs that engineering implemented in a single sprint.
- Ran A/B experiments on CTA copy, button placement, and funnel microcopy across campaign types - using competitive analysis and behavioral data to prioritize bets, resulting in measurable lifts in correct submission rates and a ~20% reduction in funnel drop-off.
- Drove cross-functional alignment in sprint planning and design reviews - surfacing feasibility conflicts before handoff and resolving constraint issues that had previously delayed shipping cycles by 1-2 sprints.
- Applied WCAG accessibility standards to all shipped flows - semantic structure, inclusive interaction patterns, and color contrast validated against AA compliance before release.

Exponent

Jan 2023 - Feb 2024

User Research Data Specialist & Product Designer

San Francisco Bay Area | Contract - on-site; UX research operations, data analysis, and product design

- Supported large-scale foundational research studies by managing, cleaning, and structuring quantitative and qualitative datasets; tracked participant data and audited session logs for accuracy and completeness.
- Generated structured reports to support research insights, and streamlined reporting workflows so study data was reliable, organized, and actionable for product decision-making.
- Partnered with researchers and technical teams to ensure data integrity across collection tools and troubleshoot data inconsistencies.
- Drove usability discovery for a pre-launch AI wearable - facilitated structured testing sessions, synthesized qualitative findings into annotated user flows and pain-point maps, and translated research directly into interface improvements that shaped the product's interaction model before launch.

- Produced research reports and journey maps that served as the design source of truth for the core product team during a critical pre-launch sprint.

Associated Students of Chico State

Jan 2022 - Jan 2023

Designer

Chico, CA

- Art directed print and digital campaigns for 20+ campus events per semester; built a scalable Figma design system with reusable templates enabling non-designers to produce on-brand assets independently.

SKILLS

Design: End-to-end product design | Figma | Adobe Photoshop | Adobe Illustrator | Adobe InDesign | Design systems | Interaction design | Prototyping | Wireframing | Information architecture | User flows | Component libraries
Research: Usability testing | A/B testing | Heuristic evaluation | Competitive analysis | Journey mapping | Synthesis & reporting
Engineering: TypeScript | React | Swift / SwiftUI | HTML / CSS / JavaScript | GitHub | Cursor | v0 | Claude Code
Accessibility: WCAG 2.1 AA | Semantic structure | Inclusive interaction patterns
Collaboration: Figma handoff | Zeplin | Jira | Linear | Notion | Agile / sprint workflows | Design critiques | Stakeholder presentations

EDUCATION

BFA Communication Design | Minor in Human-Computer Interaction California State University, Chico
3.6 GPA | Dean's List

RECOGNITION

Google UX Design Professional Certificate

AIGA Chapter Vice President

Hackathon Finalist - full product design solution - wireframes through prototype - in 24 hours
